LIFE ON WATER

In 1968, using only the will to create and progress, and his love for the big blue sea as “capital”, Nikos Farazis built the first boat for the company that was later to become **Drago Boats S.A.**

Since then, approximately 27,000 Drago boats have been cruising the Mediterranean Sea, the Atlantic Ocean, the North Sea and many rivers and lakes of continental Europe offering enjoyable and carefree times to their owners.

In 1978, when Drago became an S.A. company, it slowly began to prosper financially and to set its own course in the fiberglass pleasure boat field.

Love and respect for the sea, staff training, continuous improvement in the quality of its products, innovation, and dealing conscientiously with customer requirements are qualities that have helped Drago become one of the leaders in the European light shipbuilding industry.

Today Drago has 22 branches and 60 distribution centers in almost all European countries. Almost 95% of Drago boats's production is been exported throughout Europe. Boats are exhibited in about 16-17 of the biggest European boats shows.

The range of the boat production includes boats from 5m up to 8m, which constitute the 3 lines of the production: Yacht line, fishing line, sport line.

The colors combination are indicative

A white speedboat with a Yamaha 115 outboard motor is on the water. Two people are on board: a woman in a black and yellow swimsuit standing at the stern, and a man in a dark shirt sitting at the helm. The boat is moving towards the right. In the background, there is a large, rugged, light-colored rock formation or island under a clear sky. The water is a deep blue with small ripples.

Drago Boats S.A. reserve the right to change specifications in line with the company policy of improvement through research and development. Errors and omissions excepted. Accessories shown are for illustrative purposes only and are not included in the purchase price.
